

# Atlantis<sup>®</sup> WG Spring Physical Tank-mix Compatibilities

Revised Jan 10

Please note that physical compatibilities may not be approved tank mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. Bayer CropScience gives no warranty and accepts no liability in respect of physical compatibilities; therefore use is at grower's own risk.

**In spring and for best results, Atlantis WG + biopower<sup>®</sup> should be applied alone.**

**In soft crops avoid the use of tank-mix partners** with the potential to cause crop damage when applied in tank-mix with an adjuvant. In particular, tank-mixes with EC fungicide formulations and HBN based products (e.g. Oxytril CM) may result in transitory adverse crop effects.

**Tank-mixes with chlorothalonil** containing products have been shown to reduce efficacy and are not supported by Bayer CropScience.

**DO NOT tank-mix Atlantis WG with chlorpyrifos and AVOID sequences** as crop damage can occur resulting in significant yield loss. Where sequences are used, leave a 4 week gap between applications to minimise the risk of crop damage.

Add the recommended quantity of Atlantis WG to the spray tank half-filled with the required quantity of clean water. Add the remainder of the water with the sprayer agitation system in operation.

**Always maintain agitation during mixing and loading and until spraying is complete. Spray immediately.**

Do not leave the sprayer standing with chemical in it. Always add biopower to spray tank last.

Bayer CropScience will support tank the compatibility of tank-mixes of Atlantis WG + biopower with only one of the products listed below.

| Fungicides            |                      |                                  |
|-----------------------|----------------------|----------------------------------|
| Amistar               | Flexity              | Proline <sup>®</sup>             |
| Capalo                | Folicur <sup>®</sup> | Prosaro <sup>®</sup>             |
| Ceando                | Fortress             | Sphere <sup>®</sup>              |
| Cello <sup>®</sup>    | Helix <sup>®</sup>   | Talius                           |
| Centaur <sup>®</sup>  | Jaunt <sup>®</sup>   | Torch / Torch Extra <sup>®</sup> |
| Cyflamid              | Kestrel <sup>®</sup> | Zephyr <sup>®</sup>              |
| Fandango <sup>®</sup> | Mobius <sup>®</sup>  |                                  |
| Firefly <sup>®</sup>  | Opus                 |                                  |
| Herbicides            |                      |                                  |
| Capture               | Eagle <sup>®</sup>   | Oxytril CM <sup>®</sup>          |
| Chekker <sup>®</sup>  | mecoprop-p           | Sekator <sup>®</sup>             |
| Growth regulators     |                      |                                  |
| chlormequat           | Strate <sup>®</sup>  | Upgrade <sup>®</sup>             |

Always check individual product labels for any possible restrictions before making a tank-mix recommendation.
