

# Biscaya<sup>®</sup> Tank-mix Compatibilities

Revised March 2010

**Please note that physical compatibilities may not be approved tank mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank mix. Bayer CropScience gives no warranty and accepts no liability in respect of physical compatibilities; therefore use is at grower's own risk.**

Always maintain continuous agitation of the sprayer tank during mixing, transportation and application. All the requirements or restrictions on other product labels must be adhered to when tank-mixing with Biscaya. Contact Bayer CropScience for full details.
