

Firefly Tank Mixes

Firefly may be applied in specified tank-mixtures. The matrix charts the recommended Herbicide, PGR and Fungicide compatibilities.

Please note that only tank mixtures selected from a single column and a single row are recommended, e.g. Firefly + chlorothalonil + Eagle.

Fungicides	Fungicides						Herbicides														Plant Growth Regulators

In addition to the tank-mix recommendations above, Firefly can also be tank-mixed with one additional product from either the lists of insecticides or micronutrients. Do not mix Firefly + Hussar or Firefly + Atlantis + biopower with micro-nutrients or insecticides

Insecticides	Micronutrients			
Cypermethrin	Headland Mn 15%	Verdi-Crop 4 Yield Extra	Yara Phosyn Mancozin	Yara Phosyn Photrel
Sumi-Alpha	Headland Respond	Verdi-Crop Zinic	Yara Phosyn Mancu flo	Yara Phosyn Phosamco
decis	Headland Spirit	Yara Phosyn Coptrel	Yara Phosyn Mantrac DF	Yara Phosyn Liquid Mantrac 15%
Fury 10 EW	Verdi-Crop Human Xtra	Yara Phosyn Croplift	Yara Phosyn Mantrac 500	
Mavrik	Verdi-Crop Magnor	Yara Phosyn Foliar Potash	Yara Phosyn Sulpur F 3000	
Hallmark	Verdi-Crop Sitec	Yara Phosyn Magflo 300	Yara Phosyn Stopit	
Aphox	Verdi-Crop Supha N	Yara Phosyn Magphos K	Yara Phosyn Zintrac	

Additional 2/3 way tank mixes

- Firefly + Canopy
- Firefly + Cyflamid
- Firefly + Flexity
- Firefly + Stronghold
- Firefly + Axial + Adigor (Add Adigor last)
- Firefly + Swipe
- Firefly + Talius

Tank-mix precautions

PGR tank mixtures

Firefly may be applied, before crop GS32, in mixture with one of the following (dose/ha): -
Moddus 0.2L + chlormequat 1.25L (winter wheat)

Adjuvants

In soft crops avoid the use of tank-mixtures with HBNs, Atlantis + biopower or Pacifica + biopower. In particular, tank mixtures with EC fungicide formulations as this may result in transitory adverse crop effects.

Sulphonyl Ureas (SU)

All sulphonyl urea herbicides have the potential to cause damage to sensitive crops if residues are left in the spray tank. For this reason sprayer hygiene following the use of SU + chlorothalonil + Firefly is very important. Sprayers should always be thoroughly cleaned out with a proprietary sprayer cleaner immediately after use. This should always take place, even if further cereal crops have been treated by the sprayer between the last application SU mixtures and a subsequent broad leaved crop.

Cheetah Super, Grasp or Topik

Adjuvant oil recommended by the herbicide manufacturer may be added in mixes with Firefly.

Do NOT use any of these herbicides in mixes with Firefly + Moddus + chlormequat

Trace Elements

These products are physically compatible only, there is no information on crop safety available

General Precautions

For any tank-mix it is important that the appropriate manufacturer's recommendations should be consulted and followed, and care taken to ensure that applications are made within the recommendations for each product.

First disperse Firefly in the spray tank (follow label 'Mixing' instructions), then add the other product(s), unless specified otherwise.

All mixes should be sprayed immediately and agitated throughout until the spray tank is empty.

The user should ensure that all products to be tank-mixed with Firefly are approved for use on the crops which are to be sprayed.

Always check individual product labels for any possible restrictions before making a tank-mix recommendation.

Contact Bayer CropScience Limited for full details.

Please note that physical compatibilities may not be approved tank-mixes. Physical compatibility tests check that the products are physically suitable for application with a conventional sprayer. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank mix. Bayer CropScience gives no warranty and accepts no liability in respect of physical compatibilities.
