Folicur *	Meteor *	Tolugan Extra + decis
Fortress	Meteor + Quantum SX	Upgrade
Foundation	Moddus	
Fury	Opus	
Genie	Oxytril CM	
Hallmark Zeon	Oxytril CM + cypermethrin	

* These tank mixtures are physically compatible **with continuous agitation** and where Graduate is added to the spray tank first. Where these tank mixtures also include an aphicide, this must be added to the spray tank last.

Check individual product labels for any possible restrictions to dose rates before making a tank-mix recommendation. Contact Bayer CropScience for full details.

Please note that physical compatibilities may not be approved tank mixes. Physical compatibility tests check that the products are physically suitable for application with a conventional sprayer. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank mix. Bayer CropScience gives no warranty and accepts no liability in respect of physical compatibilities.
